

Mark the corresponding parts of your triangles that are congruent.

Answer the following questions on your construction paper with your partner...

1. What does it take for two triangles to be congruent?
2. What information were you given?
3. What information can you find out based on what you know about triangles?
4. How can you be sure that your triangles meet the requirement to be congruent?
5. Do you think any triangle with the same type of given information can be considered congruent? Why or why not?
